

Java

```
class Solution {  
    public boolean isPathCrossing(String path) {  
  
    }  
}
```

JavaScript

```
/**  
 * @param {string} path  
 * @return {boolean}  
 */  
var isPathCrossing = function(path) {  
  
};
```

C++

```
class Solution {  
public:  
    bool isPathCrossing(string path) {  
  
    }  
};
```

C#

```
public class Solution {  
    public bool IsPathCrossing(string path) {  
  
    }  
}
```
